

Software Engineer - Go · React / Next.js

Ryan PINA-SILASSE

(581) 849-3368 | ryanpinas77@gmail.com | ryan-pina.dev | LinkedIn | GitHub

Drummondville, QC · Open to relocation — Toronto

From Paris to Canada, shipping production systems that last.

End-to-end: architecture decisions, backend in Go, frontend in React/Next.js, infra on cloud-native stacks.

Currently rebuilding the e-commerce platform serving a 2M-part catalog at Midbec.

Track record: 93% JS reduction · 3-4x perf gains · 60% cost cuts · +25% traffic growth · 99% API latency reduction.

Technical Skills

Languages :	Go, TypeScript
Backend :	Go (Gin / Chi), REST APIs, PostgreSQL
Frontend :	React, Next.js, Astro, Expo, TanStack Query, Zustand, Tailwind CSS
DevOps & Tooling :	Docker, CI/CD (GitHub Actions, GitLab CI, Vercel)
Testing :	Playwright (E2E), Lighthouse CI
Practices :	System Design, Technical Audits, Code Reviews
Spoken :	French (native), English (professional)

Professional Experience

Software Engineer Mar. 2026 – Present

Midbec | Home Appliance & HVAC Parts Distributor | Drummondville, QC, Canada (Hybrid)

Technologies: Next.js, React, TanStack Query, Zustand, Tailwind CSS, Go (Chi), PostgreSQL, UnoPIM, PartSmart

- Sole engineer on the first platform overhaul since 1982: audited a legacy PHP 5.6 monolith (15+ critical risks), defined the migration roadmap, and executed it. Zero downtime on a live platform.
- Integrated UnoPIM as the product source of truth (2M+ SKUs) and built a unified search engine (model + part autocomplete) with real-time suggestions. Replacing two legacy iframe-based tools with a fully owned Go + React stack.
- Reverse-engineered an undocumented third-party API via iframe network inspection; built a Go proxy client with a three-tier in-memory token cache. Managed the full vendor relationship (LeadVenture, US) and initiated contract termination after identifying cost/quality misalignment.
- Outcomes: 8,500+ lines of dead code eliminated, Lighthouse Performance 55 → 87, API latency 820ms → 6ms (99% reduction), dev server cold start 16s → 3s.

Full Stack Developer (Freelance)

Jan. 2025 – Dec. 2025

Neat Barber | Barbershop | Paris, France (Remote)

Technologies: Astro, TypeScript, WordPress GraphQL, Cloudinary, Playwright, Lighthouse CI

- Rebuilt a legacy jQuery site solo end-to-end: audit → architecture → delivery, zero downtime migration.
- Headless CMS architecture: WordPress GraphQL with typed queries, Cloudinary for asset delivery.
- Playwright E2E + Lighthouse CI in the pipeline. Enforced performance budgets on every deploy.
- Outcomes: 93% JS reduction (600KB → 40KB), Lighthouse 68 → 94, +20% new customers, 60% cheaper infra.

Frontend Developer

Oct. 2022 – Oct. 2024

Konbini | Online Media Platform | Paris, France (Hybrid)

Technologies: TypeScript, Next.js, GraphQL, WordPress, Tailwind CSS

- Shipped production features on a 500K+/month media platform under tight editorial deadlines.
- Rebuilt the homepage with SSR + GraphQL: real-time editorial updates, 40% faster page load.
- Built a Twitch live detection integration and a dynamic partner content injection system with fallback logic zero manual intervention on content updates.
- Outcomes: +25% organic traffic (500K → 625K/month), editorial workflow 30% faster.

Education

Bachelor's Degree in Web & Mobile Development

2021 – 2024

HETIC | Montreuil, France

Relevant courses: Software architecture, OOP, Cloud & DevOps fundamentals, Agile project management.

Projects

Flip — Judo Companion App Mobile app built end-to-end: technique library (free) + training journal behind a Stripe paywall. Built evenings and weekends, not yet on the stores.

- Go backend (Chi): JWT auth, Stripe subscriptions with HMAC-SHA256 webhook verification, PostgreSQL-backed journal, interface-based mocks and full unit test coverage on billing flows.
 - Expo frontend (React Native + TypeScript): auth flow, nested navigation, technique library with category/subcategory/detail drill-down, premium paywall screen.
-

Interests

- Judo: 10+ years, regional medalist. The mat teaches you things a standup meeting never will.
